

PVP STACK-A PACK

Pine Valley Packaging has an exciting new product to offer it's growing list of automotive customers - the Reusable Stack-A-Pack.

Product Features: constructed using a standard 45x48 AIAG pallet and interlocking cap combination with rugged 1x2 structural steel frame construction with heavy duty polypropylene plastic side walls • the PVP Stack-A-Pack can be prototyped and manufactured more quickly than traditional metal racks • supplied with either custom plastic corrugated pigeon hole dunnage or returnable hanging bag system.

Product Identification: side walls can be custom printed with the customer logo and information • label card holder and ID plates available upon request

The PVP Stack-A-Pack has been developed to provide a cost effective alternative to heavy metal racks.

- Flexible cost effective design that eliminates the need for custom tooling
- Reduces production times over standard metal racks
- Reduces labour costs by reducing material handling times
- The mirror image base pallet & top cap combination prevents pack movement during the shipping process and for in-house multi-stacking units
- Maximum part protection: the durable reusable internal dunnage system holds the parts in place during shipment.
- Plastic dunnage available in a variety of colours for part identification with or without non-woven material for protection of Class A Services
- Clear vinyl curtains provide protection from dust while allowing visibility of packaged parts.
- Enables versatile system integration The standard AIAG 45x48 pallet provides stacking compatibility with other bulk pack systems.
- Maximizes product density by providing access on two sides of the container.
- Reduced transportation costs. The 45x48 AIAG pallet is designed to load out a standard 53 ft. trailer.
- Ideal for packaging a wide range of automotive parts.
