

HANGING BAG RACK

Honda Rack Solution

This hanging bag represents a unique design due to the constraints imposed by Honda regarding:

- OD dimensions of the rack, 89.5" x 47.5" x 73.25
- Number of parts to be packed per rack, 30.
- Orientation of the parts into the rack.
- Ease of inserting and removing each door panel.
- The separation required to protect each part during shipment.

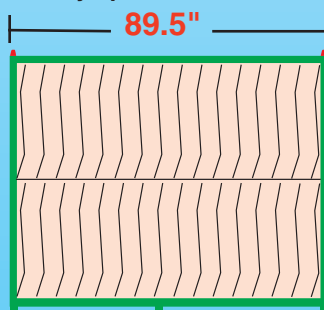

The MDX door is approximately 45" x 7.375" x 36".

Space Saving Comparison

Space required for 30 units shipped in flexible hanging bags

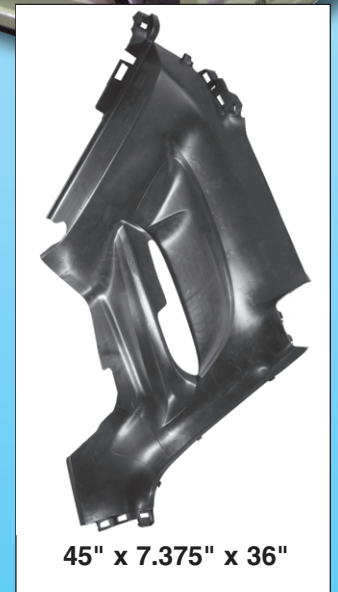

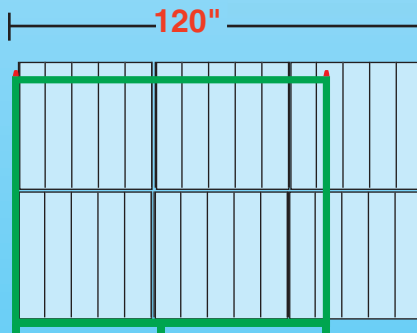

The flexible bag cell requires only 5.19 cubic feet or 60% of the rigid cell assembly space.

Designing with a fixed or rigid material such as corrugated plastic pigeon holes, would require an OD of 120" x 47.5" x 73.25". This would not fit length way into a standard truck trailer. Our hanging bag OD is only 89.5" x 47.5" x 73.25".

Space required for 30 units shipped in rigid cells

A rigid cell assembly requires 8.39 cubic foot capacity to house one MDX door.
